

SAS-PACKSAVON SOAP WRAPPER

The SAS-PACKSAVON is our novel Soap Wrapper Family studied for simple applications. Its major feature is that it can wrap the soap bars with two films (inner carton stiffener and outer printed paper or BOPP). The wrapping style is double-point end fold.

Wrapping material can be from continuous reels or pre-cut sheets (magazine).

The wrapping technology is based on the "tumble-box".

Its "balcony" and ergonomic design makes it very simple and user-friendly

The "performance to price" ratio is impressive considering that practically there is no alternate proposals on the market.

Thanks to its modern design and its simplicity the change-over is quick and the maintenance is limited.

We offer various models:

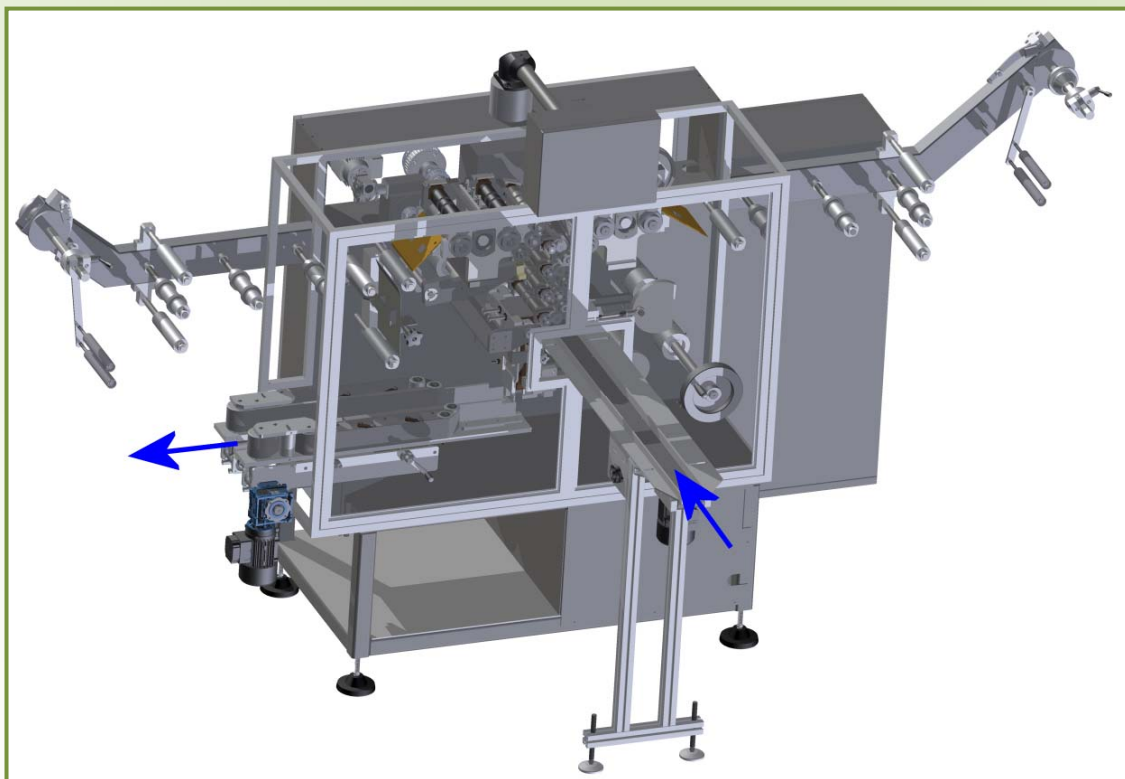

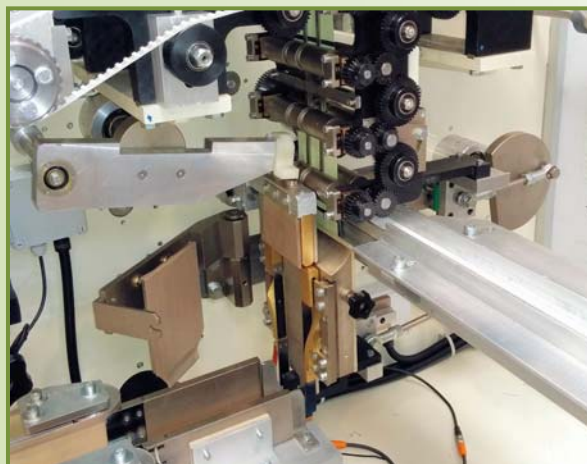

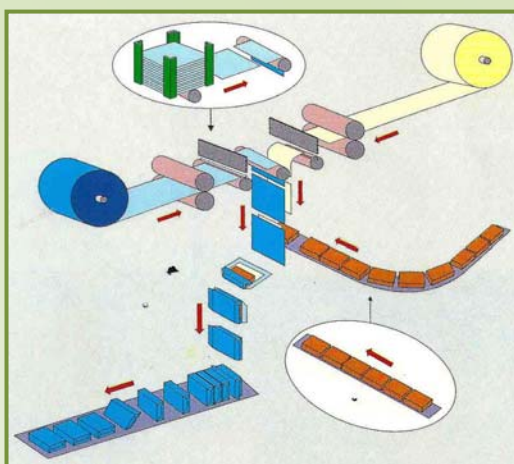

- suitable for low speed productions → PACKSAVON/80
- suitable for low/medium speed productions → PACKSAVON/120
- suitable for laundry soap or big products → PACKSAVON/L

FEATURES:

- Product shape: banded and rectangular
- Print registration device
- Electronic speed variation
- Minimum maintenance

SPECIFICATIONS:

WRAPPER	Length (min-max)	Width (min-max)	Height (min-max)	Maximum Speed
